### MRS. LORETTA JANE MOODIE DIES AT HER HOME IN CALGARY

Mrs. Loretta Jane Moodie, 62, 1023 18th Ave. E., Calgary, died at her residence on Friday, August 5. Mrs. Moodie was born in Stanleyville, Ont., and came to Big Valley in 1910, moving to Calgary in 1930. She was a member of St. Ann's parish. Surviving are three daughters, Mrs. Bertha Talbot, Mrs. Florence Olson and Mrs. Charlotte Ashwood, all of Calgary; two sons, George Edward, Calgary and Wesley Harold, Niagara Falls; and two grandchildren. Requiem High Mass was celebrated Monday, at 9 a.m. at St. Ann's church and burial followed in the family plot, St. Mary's cemetery. McNelis and Holloway were in charge of arrangements.

### MR. AND MRS. HUGH BROWN HONORED AT FAREWELL PARTY

A farewell party for Mr. and Mrs. H.L. Brown, who are leaving Carbon in the near future, was held Saturday evening, August 6. Contest and a sing song were enjoyed during the night's entertainment and was climaxed by a Grand March led by Mr. and Mrs. Brown. Following the Grand March Mr. and Mrs. Brown were presented with a gift from the community. The evening concluded with a delicious lunch.

### CHILDREN SIX YEARS OF AGE BEFORE DEC. 31 ELIGIBLE TO ATTEND SCHOOL THIS YEAR

The following notice is published for the interest of parents with children attending school as beginners and for those in primary grades.

If your child will be six before December 31, 1949, he or she is eligible as a beginner. Please register any beginners as soon as possible with Mr. S.F. Torrance.

The beginners need bring no supplies to school. These can be bought at the school at cost. Thus each child will have the correct supplies without further expense to the parents.

Children in Grade II need the following supplies: 2 or 3 smooth paper scribbles, pencil, eraser, ruler, glue, crayons. Also the following which can be purchased at the school: Arithmetic, English, Spelling and work books for the readers. The readers are supplied for Grades I, II and III.

Grade III needs the same basic supplies as Grade II. The texts, as in Grade II, can be purchased at the school.

If you have any magazines which you are going to discard, I would appreciate having them for the pictures used in the children's scrap books.

MRS. OLIVE MUNROE, teacher

### Mrs. W. Hodgson Dies at Drummeller

Margaret Ellen Hodgson, a resident of the Drummeller and Carbon districts for the past 45 years, died in Drummeller Wednesday, August 3 after a short illness.

Born at Minden, Ont., 62 years ago, Mrs. Hodgson is survived by her husband, Wilfred, two sons, Eric and Thomas of Drummeller, one daughter, Miss Monica Hodgson of Calgary; also a sister, Mrs. Ethel McFarlane of Carbon, and four grandchildren.

Funeral services were held in the Chapel in the Valley, Friday, August 5, with Rev. C.J. Brown officiating. Interment was in the family plot in the Anglican section of the Drummeller cemetery. Winters' Funeral Home was in charge of arrangements.

### REV. AND MRS. J.W. WAY HONORED AT SOCIAL EVENING

A social evening honoring Rev. and Mrs. J.W. Way, recent newcomers, was held in the Scout Hall, Carbon, on Tuesday evening, August 2. The program of entertainment consisted of games and dancing. Lunch was served by the ladies of Christ Church W.A.

Following lunch Rev. and Mrs. Way were presented with some very lovely gifts for which the bride and groom very graciously thanked those present. A most enjoyable time was had by all.

### Junior Club Rally Held at Carbon

A very successful Junior Club Rally was held in the Carbon community park on Friday, August 5. The Rally was sponsored by the Alberta Department of Agriculture and the Drummeller District Agricultural Society, with all local arrangements in the hands of the Carbon Community Club.

Mr. Ted Schmidt was master of ceremonies and chairman for the day and introduced one of the youngest mayors in Alberta, Mayor E. Fox of Carbon, who welcomed some 300 visitors who gathered from a radius of 40 miles. Included in this number were club members, leaders and the parents from the following clubs:

Sarcee Butte Girls' Club, led by Mrs. A. Cameron; Rosebud Girls, led by Mrs. L.W. Comstock; Acme Junior Wheat Club, led by A.C. Bates; Beiseker Junior Wheat Club, led by Roy Hagel; Carbon Junior Wheat Club, led by Norman O. Nauser; Drummeller Junior Wheat Club, led by W. Brooke Wade; Three Hills Junior Wheat Club, led by J.G. Umbrie; Trochu Junior Wheat Club, led by W.J. Taylor; Acme Dairy Club, led by C. Webb; Allingham-Sunnyvale Junior Beef Club, led by Alvin Kleib; Three Hills Junior Beef Club led by J.G. Barkley; Rosebud Junior Beef Club, led by R.J. Clark Jr.

After the welcome by Mayor Fox the gathering was addressed briefly by S.J. Garrett, chairman of the Carbon Community Club; P. Knehl, Municipal; A.C. Grenville, president of the Drummeller District Agricultural Society; J. Aleock, Field Manager, Alberta Wheat Pool, N.F.B. District Agriculturalist; and L. Usher, Assistant Supervisor of Junior Club activities.

Most of the afternoon was spent in competitions and athletic events, including a swimming race in the splendid community pool which was placed at the disposal of the rally. Events included an 800 yd. race, won by Bel-seker, with Acme second; Relay race, 1st Beiseker, 2nd Acme, 3rd Three Hills; Grain Judging competition, 1st James Andrew, 2nd D. J. Buyer, 3rd Gerald Nesbitt, 4th Gordon Park, 5th H. Harsch, 6th O. Gustafson; Identification of Potage Seeds, 1st Gordon Park, Trochu; 2nd D. Buyer, Carbon; 3rd Wilfred Rose, Acme; 4th Del Bates, Acme.

The day's events concluded with a picnic lunch on the tables under the trees of the park, and a hand ball game. Before leaving the juniors gave a lusty three cheers and a tiger for the Carbon Community Club, local sponsors of the rally.

### CANADIAN WOODS NOT SUITABLE FOR CHINA

The ever-present "dollar shortage" is the source of most difficulties in international commerce today, but a recent report from Hong Kong adds another trade barrier—termites.

Canadian woods are subject to attack by Hong Kong termites, and therefore there is little possibility for the export of forestry products for the construction of furniture trades in the Far East. The principal wood used in Hong Kong is teak from British North Borneo which has proved to be termite resistant.

### BADGER SHOT IN VILLAGE

Excitement ran high for a few minutes last Friday when Mrs. Gordon Hunt encountered a badger in Mr. Dick Poole's yard in Carbon. Constable Pickertill of the Carbon detachment of the R.C.M.P. was called to the scene to destroy the animal. It is believed that this is the first time in the history of the village that a badger has been seen so near to the business section of the village.

### NEW TRACTOR TO BE PRODUCED IN AUSTRALIA

An Australian firm is ready to produce a wheeled tractor specially designed to suit farming conditions in that country. The essential characteristics of the tractor, priced at approximately \$3,225, is its mechanical simplicity, enabling the operator to perform all but the major repairs. This is a necessary condition in Australia, where servicing organizations do not normally cover country areas.

DORIS VEALE

Doris Veale is an experienced composer of incidental music for radio drama, who plays frequently in CBC network programs, including John and Judy, which returns in the fall for its seventh season on Trans-Canada. Miss Veale is at home with most keyboard instruments.

Japan has three-and-a-half earthquakes a day, on the average, though most are imperceptible.

The wearing of pendants as jewelry is derived from the primitive practice of wearing wild animal teeth, stones, or shells around the neck with magical intent.

### 726 ENTRIES IN BARLEY CONTEST

Despite handicap of drought and other factors which in areas have normal crops, at least 726 farmers in the three prairie provinces have entered the National Barley Contest in 1949.

Figures released August 3 by the Barley Improvement Institute give 214 entries from Manitoba, 332 in Saskatchewan and 150 in Alberta. Additions are probable when the final figures are compiled by the provincial committees.

In Manitoba the number of entries is slightly below last year and in Alberta the decrease is considerable. An unusually dry June in the north and north central maling barley areas of Alberta severely damaged the crop in districts which normally would have produced the biggest number of entries.

This year there is only one competition. Last year there were two. The 1949 competition is exclusively for producers of malting barley in commercial quantities and calls for a carload entry of a minimum 1,007 bushels.

In Saskatchewan the entries are more than last year. Although the southwest part of the province was hard hit by drought, the barley area in the northeast has had ample rains and generally the barley crop is good.

### BUILD IT YOURSELF WITH EASI-BILD FULL SIZE PATTERNS

Build it yourself patterns simplify making all the articles illustrated in our catalogue folder. There are FULL SIZE EASI-BILD PATTERNS for making furniture, toys, and household equipment, while the Easi-Bild Pattern method of construction takes all the mystery out of building everything from a one-car garage to a five-room, ranch-style home.

There are no blueprints to read or scale drawings to follow, because the ACTUAL SIZE patterns show the location of all adjoining parts as well as the location of bolts, screws, etc.

EASI-BILD PATTERNS are economical, most of them sell for less than one dollar.

Come in and look over our catalogue of EASI-BILD PATTERNS containing over 100 patterns for making useful articles.

## Fear Of World Famine

THERE ARE A NUMBER OF ASPECTS to the problem created by the dwindling of world food supplies on one hand, and the constant increase in population on the other. Erosion and deterioration of the soil are considered to be the basic causes of decreasing food production and are looked upon as the most serious menace to agriculture in the years to come. There is much concern over this problem and efforts are being made to combat the gradual decrease in the acreage of productive land throughout the world. The population is now increasing at the rate of over twenty million people a year, or about \$4,000 a day, and it is expected that the present population will be doubled in twenty-five years. In view of these figures it is clear that even if present rates of production were maintained there would be insufficient food supplies to meet the future needs of the population.

### Other Methods Less Practical

Experts on this subject are agreed that even although efforts to combat erosion and other factors which cut down the productivity of the soil may be successful, additional measures will be necessary if fair levels of nutrition are to be maintained throughout the world. A number of possibilities have been considered in this connection. It has been suggested that food might be produced in chemical solutions, independently of the soil, but although this has proved successful on a moderate scale, scientists are doubtful of its value as a means of replacing soil for growing foodstuffs. It has also been suggested that food might be produced from the sea, but again scientists doubt the practical value on a scale sufficiently large to be of value. One method which is already being used but which also has its limitations, is that of bringing new land under cultivation. In Africa, South America and other less heavily populated places, much new land has been successfully brought under cultivation in recent years.

### Yearly Waste Is Very Great

One aspect of the problem which is not often discussed is that of the annual waste of food products. It is not uncommon for people from lands where food is less plentiful than it is on this continent, to be appalled at the waste in homes, institutions and stores here. On a much larger scale, however, is the loss due to pests, rodents and mites. Figures gathered by the Food and Agriculture Organization of the United Nations have shown that 65,000,000 tons of grain are destroyed each year by these means. If this waste were eliminated a great deal more food would be available and it would appear that if this, and the erosion and deterioration of the soil could be brought under control, a large part at least of the threat to world famine could be removed.

## FUNNY And OTHERWISE

"Whenever my wife needs money, she calls me handsome."

"Handsome?"

"Yeah—handsome over!"

**Maid**—"I'm very sorry, Miss Brown, said to tell you she is not at home."

**Mrs. Cayenne**—"That's all right, don't tell her I'm glad I didn't come."

**Mrs. Newwed**—"Darling, what's wrong with this cake you baked?"

**Mrs. Newwed**—"It's probably the shells. The recipe called for three whole eggs."

**Brain Case**—"Look here, the rain is simply pouring through the roof of my bedroom."

**Summer Hotel Proprietor**—"Absolutely according to our prospectus, sir, running water in every room."

**Customer**—"I'll have some raw oysters, not too large nor too small, not too salty nor too fat. They must be cold and I want them quickly."

**Waiter**—"Yes, sir. With or without pearls."

**June**—"Good evening, old man. Thought I'd drop in and see you about the umbrella you borrowed from me last week."

**Brown**—"I'm sorry, but I lent it to a friend of mine. Were you waiting it?"

**June**—"Well, not for myself, but the fellow I borrowed it from says the owner wants it."

As the train pulled into the station, the porter knocked on a compartment door.

"Chicago," he announced. "Shall I brush you off, madam?"

"Certainly not," she replied icily. "I'll descend in the usual way."

The Rural-urban Conference was at lunch, and a discussion had arisen as to the duties of the lady in country parishes.

"The activities of the laywomen," said an authoritative voice, "must be definitely organized."

"What is a laywoman, precisely?" someone asked.

The Rural Dean's 13-year-old daughter broke a long silence:

"A lay?"

A puzzled small girl watched a party of anglers putting off in their punt.

"But, Mummy," she asked, "do the fishes like all that beer?"

"So you really think your memory is improving under treatment?" he asked. "You remember things now?"

"Well, not exactly, but I have progressed so far that I can frequently remember that I have forgotten something, if I could only remember what it is."

In a discussion on women's styles in an American quiz show, an elderly man was one of the contestants. He was asked: "I suppose you are old enough to remember wamp waits?"

"Remember 'em," he exclaimed bitterly. "That's when I got stung."

## Scientists Want To Make Potato More Nutritional

OTTAWA—An experiment on potatoes now being carried out in eastern Canada, with higher nutritional value as its aim, will make its effects felt throughout the country if the researchers get the answers they are looking for.

At three eastern universities—Montreal, McGill and McDonald College—scientists are now, among other things, trying to find out how to increase the thiamin content of the most widely eaten of all vegetables. Thiamin or vitamin B1 is the famous "morale vitamin" of the war, with a beneficial effect on the nervous system. Its absence causes neuritis and stomach disorders.

Chief sources of the vitamin are naturally occurring in meats, cereals, notably the wheat germ.

Next to beans, potatoes have more of it than any other vegetable, although they are not particularly rich in thiamin. But the point of the current research is that any improvement in the nutritional value of farm produce is of benefit to the entire nation.

Nutrition experts of the health department point out that as thiamin is soluble in water, a certain amount is lost in cooking. This loss can be held down to perhaps 10 per cent, through using a minimum amount of water, and not boiling too long. Otherwise it may run to 50 per cent.

## Woman Holds Secret For Miracle Roses

VICTORIA, B.C.—"Miracle" roses have been blooming for over a year in the home of Mrs. F. F. Wenman, here.

Visitors who called at the house have stood in awe to look at cut roses which have retained their freshness and color for 12 months.

Mrs. Wenman disclosed that the phenomenon was no "miracle," but a knack of treating flowers which she discovered some years ago. She said she believed she had discovered a method of preserving cut flowers for an indefinite period.

"I've been working on the process for five years," she said. "I think I have succeeded. I'm now attempting to find a way of speeding up the process."

"I think there will be a day when people will buy flowers which will last indefinitely."

Mrs. Wenman refused to divulge how it is done. "This is a secret which for the time I'm keeping to myself," she said.

Altons have been talked about since pre-Socratic times.

## ITCH CHECKED IN A DAY—OF MISTY BACK

For only relief from itching caused by eczema, urticaria, and other skin conditions, try the only B. O. PRESCRIPTION medicine. It's the only one that's guaranteed to stop itching in 24 hours. It's the only one that's guaranteed to stop itching in 24 hours. It's the only one that's guaranteed to stop itching in 24 hours.

## TAKES POSITION ON ALBERTA NEWSPAPER

WYNARD, Sask.—Editor of the Wynyard Advance the past two years, Ken Miller is leaving for Vancouver, B.C., to join a newspaper there as shop foreman. Mr. Miller was member of the school board here, officer of the curling club, board of trade, junior baseball club, Canadian legion and Masonic lodge.

## B.C. To Have Registry For Crippled Children

OTTAWA—Health Minister announced government approval of \$3,700 in federal grants to set up a crippled children's registry in British Columbia.

The registry will be in charge of a qualified nurse who will classify and analyze crippled children's records received from physicians and institutions.

On the basis of information obtained in this way a more comprehensive treatment program would be worked out by the provincial health authorities and other interested groups.

## ASKING GOVERNMENT FOR STANDARD TIME

SASKATOON—The C.C.F. movement in Saskatchewan wants the government to put the province on Standard Time, beginning next year.

In adopting a plan report, delegates to the provincial C.C.F. convention asked for legislation to this effect. They favored the prohibition of daylight time everywhere in the province.

The Coliseum of Rome, built in the first century, A.D., could seat 50,000 spectators.

## Butter Surplus Not Abnormal

REGINA—Rt. Hon. J. G. Gardiner, Agriculture Minister, said there is no need for anyone to try to find an outlet for the butter surplus the Canadian Government is currently building up.

Mr. Gardiner said in an interview there is nothing abnormal in such surpluses. Reserves now accumulating were needed to carry Canada through its annual low-production period.

The Federal Agriculture Minister was commenting on a report that Government experts were trying to find an outlet for a steadily increasing accumulation of butter that was expected to reach 60,000,000 pounds by September.

"We produce about 40 per cent more butter in the summer than we consume and every pound must be stored if we are going to be able to supply our market from December until April when we are producing only about half the butter we consume."

"If we do reach 60,000,000 pounds storage, we will only have a normal supply."

## Ask Double Payment To Assist Farmers

SWIFT CURRENT—Inability of the dollar to purchase as much as formerly brought forth a resolution endorsed at the annual municipal convention of district 3 at Swift Current. Delegates recommended that the P.F.A.A. be asked to be doubled to meet needs of farmers in dried out areas.

—By Les Carroll

## B.C. Endeavours To Protect Finest Sporting Grounds On Continent

VANCOUVER—British Columbia is spending \$620,000 this year to keep her vast ranges and lakes the finest sporting grounds in North America. The provincial game department, in a pioneer research program, is using the brains of scientists and the feet of rugged field men to ensure that B.C. will continue to be a happy hunting ground.

At the moment its position is anomalous. To preserve elk and moose on the interior ranges the department may have to burn over much of the winter feeding ground.

A three-year study of the two species shows the animals are far ahead of the hunters. They have overhauled winter ranges and are in danger of eating themselves right out of the country.

Game department officials are particularly concerned about the effect of lack of food on the young.

"The percentage of calves to cows is not what we would like to see," said Game Commissioner Frank Butler, "but it is mainly due to food conditions."

He described the shortage of winter feed in some interior areas as "very acute," and said: "We'll either

have to increase the feed or reduce the herd."

Increasing the feed would entail burning off the evergreen verdure with a controlled fire, allowing tender willows and small poplars—a favorite food of elk and moose—to grow up. After a few years when these succulent foods grow out of reach of the herd or are choked out by untalented pine and spruce, the process would have to be repeated.

The alternative—raising the bag limit—has been described as a delicate adjustment that might take years to balance. A checking station has been operating for three years at Cache Creek, a funnel-like outlet for the huge Cariboo range. Hunters are checked for animals sighted as well as for their kill, and are asked to spot the location of the kill in place and time of day.

In the area east of the Fraser River, which divides the Cariboo roughly in two from north to south, the season this year will open on Oct. 1 instead of Sept. 23. The extra week will give the bulls more time to service the cows. The move was a result of compilations showing an undesirable balance between young and mature animals.

How does this tie in with a shortage of winter hater?

"We will have to gamble on winter conditions," James Hatter, game biologist, said. "Indications lead us to expect several mild winters, and as a consequence the ranges will support more heavily hunted ranges."

It is some heavily hunted ranges, notably the South and North Okanagan, Kootenays, Similkameen and Yale electoral districts, the bag limit on deer has been reduced. The deer find enough winter food.

Another innovation introduced by the department is a moose-tagging program, unique in Canada. The data gathered will tell research scientists how the moose travels and other unusual particulars about his life span.

The important thing that underlies the whole study, Commissioner Butler explained, is the preservation of a balance between the hunting pressure and the size of the herd.

Overweight persons are said to be poorer surgical risks than those of normal weight.

## Slenderizing Lines, Prominent Pockets In Fall Frocks

The red heather wool jersey model, (left), has pockets as its feature attraction. Brown bone buttons run down the front. Slenderizing lines, broken by prominent pockets, is the theme of the two-toned gray wool frock, (right).—Central Press Canadian.

*Decoratively SPEAKING*

(By Francis James)

Gene are the days when Junior was given the old, clipped bureau from the attic, the rug that used to be in the dining room, the bed that belonged to big Cousin Bob before he got a job, and a mattress that didn't follow out where you lay on it.

Gene are the days, in other words, when Junior felt like an old, forgotten thing that nobody else wanted. The days when he was supposed to spend all waking moments on a baseball diamond and never, ever notice that his wallpaper was stained where the roof had leaked on it, or that his curtains were streaked where Mother had let them down after he took them out of the spare room.

Those days are really gone forever. It is now believed in many quarters that Junior, despite his peevishness and dirty face and bad nails, is a person who cares about his looks and the kind of place he lives in. Psychologists are even saying that an attractive, well-planned room is conducive to mental development. Of course, we are not prepared to say that there are any great men around who are great solely because they had attractive bedrooms. But still, it does seem logical to think that if a boy has a room that's nice to be in, he's going to be in it more. And if he is in it a good deal

he will, sooner or later, run out of trophies to polish and of presents to pin up. And he may even, after a while, turn to a little homework—or mental development—to to while away the time.

A young boy certainly doesn't demand the work and fussing in his bedroom that the female counterpart does. Plain, but smart, is the watchword. And a little good management, a lot of good taste, should accomplish this without too much trouble.

Wallpaper for a boy's room is important—and easy. There are any number of stanch designs to delight a young boy's fancy. Rough textures, wallpapers in smart, neutral colors are perfect foils for the peculiar "decorations" boys like. Or he likes something with a bit more spirit. There are plenty of sturdy murals, sporting themes, and conventional patterns in substantial designs with a definitely masculine feeling that will satisfy Junior completely.

As to furnishings—not much is required. A bed, a bureau, a desk, a chair or two, will do it. After the time and tears the average mother puts into daughter's stuffy rooms, surely she could take a minute to see that Junior's furniture is properly painted, or properly stained. Let her see that his curtains are smart and masculine. Monks cloth or a rough

NEW YORK—Don't force your child to eat, says Dr. Elizabeth Hurlock, who is also a mother.

"A child quite often knows better than it should eat than its mother," says Dr. Hurlock. "My daughter persistently refused to eat liver and soon we found out that she was allergic to it."

Instead of standing over your child, urging him to finish white on his plate, remove the uneaten food without comment or show of concern. Unless he is allergic to it, your child soon should accept, the food without fuss or bother, says Dr. Hurlock.

"Scientific studies of taste have shown no inherent food dislikes except for food that is harmful to the human body," Dr. Hurlock adds. Some of the reasons children develop food dislikes are because one or other of the parents has expressed a dislike for it in the child's presence, or because the food is overcooked or overseasoned.

Textured fabric in plain color are good for a boy's room. His floor covering shouldn't be something the dog chewed, but rather stanch and colorful that will make his room the kind of place that is good for his mental development.

A clock that winds itself every time the temperature changes one degree has been invented.

ALBANY report sighting the lost city of Farnu in South Africa. Tough luck that town—safely hidden all these years and now it has to be discovered in the midst of the Atomic age.

Farnu is believed to have been founded by Chinese. If so, they went a long way from home just to lose a city.

The ant, has two stomachs. In order, no doubt, to enable it to attend two picnics the same day.

Maybe that Los Angeles postman who failed to deliver mail because his feet were tired really thought he was just observing his Kint to Dogs Week.

Report of the discovery of a monster, half-alligator and half-lizard in the Ohio River. Dr. C. D. Duncanson would like to wonder if the Loch Ness serpent may not have become an immigrant D.V.

Speaking of the serpent, it seems the Loch Ness Devil is just a piker—or rather an angle worm—compared to the monster that was dreamed up during the middle ages.

THOSE SONGS  
"Some songs are written for men to sing; others for women, but the radio writers never pay any attention to that," writes a young woman. "The other night I heard a woman singing 'When You Were a Teeny and I Were a Big Red Rose.' How ridiculous a man would talking a tulip!"

A fellow I know reverses things for his winter and summer vacations. In the winter he goes to a summer resort. This he gets bargain prices. In the summer he goes to a winter resort. He tells me that in Miami, Fla., luxury apartments that rent for \$800 a month in the winter can be obtained for \$50 a month in the summer.

PLEASE NOTE  
Have you ever been in possession of an "evilsmiting match"? one that furnishes light for a great number of times. There is said to have been a match related in the United States that would light four thousand Expresses got off in front. In the backstretch he was leading by 10 lengths. Rounding the turn he was in front by 15 lengths. Coming into the stretch Morning Express was 20 lengths in front and just taking home the race. Mr. Longhouse was quite pleased. "The only way that horse can lose now is to fall down. He's said to the fellow with the match," said that Morning Express did. He dropped dead. Right in front of the grandstand. Ten yards from the finish line.

NEVER CAN TELL  
At the Hong Kong race course, Henry Longhouse, the brilliant British journalist, was once given a hot tip on a horse named Morning Express. He was sure that the horse would win the race. He was sure that the horse would win the race. He was sure that the horse would win the race.

ASIDES  
Jim Munroe, a Canadian racing official, originated that form of wagering known as the Daily Double. That was Frank Menke says. If speculation is confined to Kansas on the check the chances of catching cold are greatly lessened. That's what's happened. That's what's happened. That's what's happened.

It must be so. It is now up to some genius to develop a technique that will make on-the-check-kissing interesting to the younger set.

## STAMP CORNER

By JAMES MONTAGNES

New issues received include (top left and right) stamps issued by Poland for a workers' congress and (center) a stamp issued by the United States post-office at Washington.

The Philatelic Agency of the United States post-office at Washington reports sales of stamps at end of its fiscal year, June 30, totaling \$4,136,132. This is the highest sale at the Washington agency, only one of a number of philatelic bureaus operated by the United States post-office. Previous high was \$3,231,291, for fiscal year ending June 30, 1947. The big 1948 total is accounted for by the 30 different stamps issued during the year. Since the agency was formed in 1921, sales to stamp collectors all over the world from the Washington office have amounted to over \$35,000,000.

In addition to the Washington philatelic agency, the U.S. postal authorities have special philatelic windows at all main city post-offices. These stamp collectors can obtain well-centered copies of current commemorative stamps in their home cities by applying at the main post-office, at most of such philatelic windows, there is a list prominently on display as to what commemorative stamps are available. No records have been announced of sales at these various philatelic windows.

In Canada the post office department maintains a philatelic division at Ottawa, where stamp collectors can have their wants listed of unused well-centered copies of current stamps and those issued some years ago. A list of stamps available at the philatelic division of the Canadian post office can be had by writing to the agency at Ottawa. Currently stamps of Newfoundland are also being sold by the Ottawa philatelic division, stamps which were taken over when Newfoundland joined Canada last March. The Canadian post-office annual report for 1948 is not yet available to learn sales of the philatelic division.

A number of other countries operate similar philatelic divisions. Collectors are Canada stamps, included are the Canal Zone, which has

such an office at Balboa, Canal Zone. The Philippines Republic makes available new issues at face value through its embassy at Washington. The Pan-American Union's philatelic division at Washington, has available stock of current stamps of a number of Central and South American countries at face value. Liberia's consular office at New York, keeps certain supplies of current commemorative stamps for sale at face value to collectors. A certain number of European countries have philatelic offices at their capitals. New Zealand makes available current stamps at face value to collectors through the general post-office at Wellington. New Zealand. India has its philatelic agency at Bombay.

New issues . . . Leward Islands has issued new design stamps. Korea has issued new design stamps. Korea has issued new design stamps. Korea has issued new design stamps.

Mauretius is to issue a new pictorial set . . . Southern Rhodesia is issuing two stamps for the 75th anniversary of the Universal Postal Union . . . Seychelles has issued a purple 50-cent stamp in current design . . . Surinam, under Communist control, has issued a stamp for the occupation of Nanking and Shanghai . . . Cuba is issuing a set to mark the centenary of its flag . . . Chadania, a military territory of French North Africa, has issued a stamp to a historic tower . . . French has issued a stamp to a horticultural scientist, Yves Michon . . . France has issued a stamp to author Jean Racine, who died 200 years ago . . . Spanish Morocco has issued stamps to the recent marriage of King Juan Carlos and Princess Eleanora.

Ed. Note.—If you have any new Canadian, Newfoundland or British North American stamps for sale or exchange write to our Advertising Director, Mr. Frank Menke, 130 Wellington St. W., Toronto 1, Ont., who is an authorized dealer. Please enclose self-addressed stamped envelope for reply.

## Modern Styles Affect Indian Fur Trappers

BOULDER, Colo.—Modern fur fashions are causing hardships among Indians of Canada's north-western provinces, says a spokesman of the land, Bishop R. J. Renison of the Moosehide diocese of the Church of England.

Bishop Renison, who has returned from a 3,100-mile journey to the 30 mission posts in his diocese, said: "Women don't have long fur any more."

"Women don't have long fur any more," he said. "They are being worn as ornaments, not as protection from cold."

Fashion's dictates for short fur suits hungry Indian trappers, the 75-year-old bishop said.

But he didn't place all the blame on the women, "Men," he said, "once were proud of their fur-lined coats."

But for dandies government family allowances and old age pensions, said, the Indians would undergo severe hardships this winter owing to "the vagaries of fashion" and fur competition.

However, he said, the trading posts of the Hudson Bay Company that buy furs from the Indians have undergone "wide modernization."

The company has ended that sales barrier for furs. Now buyers must go to Montreal to learn to grade furs at the point of purchase. As a result, the bishop said, the itinerant and black market dealer has been driven out of the north where he formerly got the cream of the fur crop.

Bishop Renison spent 41 days touring the 350,000 square miles of his diocese, when he visited the new mission of White River he confirmed 125 Eskimos.

# World News In Pictures

**THIRTEEN ESCAPED AS FIRE RAZED SUMMER ESTATE**—This air view shows destruction done when fire almost completely destroyed summer estate of David Dunkelmann, 67, at Hallowell, Ont. Damage done to the rambling dwelling, show place of the summer resort district, and its contents was estimated at \$100,000. Thirteen people, including four children, were in the house when fire broke out in nurse's room in nursery but they all escaped uninjured.—S.N.S. photo.

**THIS CHAMPION YORKSHIRE SOW** at the Edmonton Exhibition was shown by Alfred Strachan of Carman, Man.

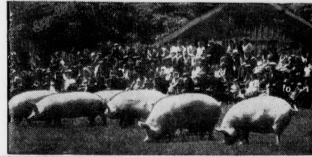

**WINGLESS CHICKENS**—This is part of a group of 400 wingless chickens developed by Peter Baumann, of Iowa, U.S.A., who says the wingless variety have larger breasts and thicker legs. He says he worked for 12 years developing the wingless birds and gets 95 out of every 100 birds hatched.

**SURVIVOR OF PLANE CRASH**—Actress Caren Marsh, 23, was among 24 injured when a twin-engine transport plane carrying 48 people on a run from New York to Los Angeles, Calif., crashed into a peak in the Simi mountains, 30 miles north of Los Angeles. The crash was blamed on a heavy overcast which completely covered the mountains.—S.N.S. photo.

**PARADE OF CATTLE**—Eighteen thousand farm people visited the Ontario Agricultural College during the annual Farm and Home week. The top picture shows part of the parade of beef cattle from the College herds and below is a group of good Yorkshire sows.

**ONE OF PRETTIEST, MOST ARDENT ADMIRERS**—One of Prime Minister Louis St. Laurent's greatest admirers is his 15-year-old granddaughter, Louise Garnon. As well as being one of the most ardent admirers, it is a good bet that she is one of the prettiest.—S.N.S. photo.

**ALL IS QUIET ONCE MORE!**—Viscount and Lady Alexander are seen receiving rousing reception at Meaford, Ont., even though popular mayor Stanley Knight, wasn't on hand to join in welcoming ceremonies. The mayor had resigned when a difference of opinion had arisen between himself and Canadian Legion head, Neville Noble, as to how to welcome governor-general. The ex-mayor wanted to greet Viscount Alexander, alone, while legion head thought that there should be a guard of honor. However, despite difference of opinion, the two men are friends once more and citizens of Meaford are hoping that Mr. Knight will resume his post as mayor of Meaford.—S.N.S. photo.

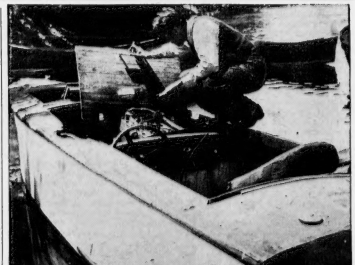

**CHARGED WITH MANSLAUGHTER**—Adam Blandy, 37, a farmer from Holland Marsh, near Barrie, Ont., has been charged with manslaughter in connection with car accident in which five people from Hamilton were killed during a rain-storm near Schomberg, Ont. Blandy and two other passengers with him, escaped with minor injuries, but others, all of one family, were killed.—S.N.S. photo.

**HIT BY TRAIN**—Daniel McDaniel, 19, a native of Winnipeg, Man., died when taxicab he was driving was hit by a train, just as it was entering London, Ont. His passenger, however, was uninjured.—S.N.S. photo.

**MINER'S FAMILY READ GOOD NEWS**—Bearer of good news to this miner's family in Pittsburgh, Pa., is hometown paper announcing the "no strike" news. John Fubaltch, his wife, Dorothy, and their children, left to right, John, Jr., 4; Kenneth, 3 and Priscilla, 6, are just one of thousands of families who received with Thanksgiving steel industry's "big three" acceptance of President Truman's plan for a 60-day truce. Truman has named a three-man fact-finding board which will investigate the steel wage dispute.—S.N.S. photo.

**FIVE ARE DROWNED WHEN LAUNCH EXPLODES**—Five persons from Bord, Que., drowned when an explosion shattered their 20-foot motorboat during a moonlight cruise on the St. Lawrence river. Two escaped by swimming to shore, but five others drowned when blast hurled them into water. The dead, who are all from one family, are: Therese, 21; Giselle, 20; Lucienne, 19; Marcel, 17, and Jerve Cournoyer, 27. Here engine, where fire started, is being examined by policeman.—S.N.S. photo.

# WORLD HAPPENINGS BRIEFLY TOLD

Arthur Pearson, 70, who claims to be London's oldest working postman, reckons he's walked 100,000 miles in his 40 years' service.

Vaccinations were cleared from the beach at Great Yarmouth, England, while soldiers exploded three mines found in the sand.

A 45-year-old man who lived 26 years disguised as a woman to avoid military service committed suicide in Holland when arrested.

Francis Giddens, 75, one-time private secretary to former Prime Minister Mackenzie King, died recently on his farm at Perkins, Mills, Que.

Buyers from Britain, Canada and the United States attended Lemmings' 20th fair auction recently. Auction conditions stipulated payment in United States dollars.

Hall storms north and east of Calgary wiped out thousands of acres of crops. J. Glen Harkin, chairman of the Alberta Hall Insurance board, reported.

Alan Bygrave and Bernard Allen, British army cadets, have invented and built a training gun. They hope to be military backing to have it patented.

Two men scooped up a fortune in diamonds from a Fifth Avenue jewelry shop in New York, but were captured with their loot as they tried to flee in the crowded subway. They were valued by their owners at \$385,000, were recovered.

## KITCHEN MEDITATIONS

### WHY?

BY JANE DALE

Why do you sing so merrily.  
Little bird, sitting on the bough?  
I heard you caw at dawn of day.  
I hear you singing now.  
Why do you sing near the red rose bush.  
Little bird, tell me, I pray?  
Is it because of the leafy green.  
That you sing in the leafy green?  
Why do you sing so sweet and clear?  
Little bird, could I suppose?  
You are singing your merry song—  
Serenading a rose!

## THOUSANDS OF BEES BLOCKED CHURCH DOOR

ELMWOOD, Ill.—Six members of a beekeepers' club performed a honey of a job at the Graham Chapel, a rural church near here.

They donned sun helmets and men's masks over their faces and killed some 60,000 bees which had blocked the front entrance to the church for three weeks, halting services.

Lloyd Ravenscroft, club president, who headed the three-hour candle gas attack on the bees, said: "We took the sting out of the situation but preserved the honey."

Watermelons are native to tropical and South Africa.

## Weekly Tip

### BERRY STAINS

Spread washable material stained by fruit over a bowl and pour boiling water through the fabric until the stain disappears.

# Portable Poultry Waterer ::

It's a simple matter to hook up a 40-gallon oil drum to feed water automatically into a trough.

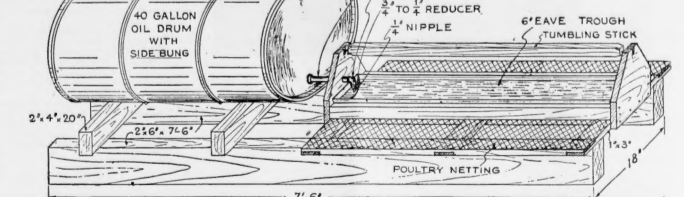

THE problem of watering large numbers of chickens or turkeys on range is often difficult unless automatic equipment with tanks of considerable capacity is available. We are showing herewith a homemade waterer using a 40 gallon oil drum as a supply tank. The watering trough is of the type in which the flow of water is controlled by the amount of water removed from the drinking trough. From this standpoint the principle of operation is the same as that of the small poultry waterers in which two air-tight vessels are slipped over each other, the lower end of the outer covering extending below water level in the trough to shut off the flow of air into the upper part of the tank. It will be noted that the feed pipe from the drum to the trough consists of a 3/4 inch, long nipple of piping, the outer end of which is reduced down to a 1/4 inch nipple. The length of this nipple should be such that it will rest about 1/2 inch below the surface of the water when the water trough is full. This means that before water flows from the tank, the feeding trough has to be emptied to a point where air can enter the 1/4 inch nipple to release some of the vacuum in the upper part of the water trough. As the water level rises above the end of the nipple the flow again stops.

In filling the drum of this waterer it is necessary first to place a small wooden plug in the end of the 1/4 inch nipple before the bung is removed from the top of the drum. The bung is then opened and the drum filled with water after which the plug is replaced making the drum airtight. The plug is then removed

from the nipple and the water allowed to flow.

Care should be taken when placing this waterer, to make sure that it is not placed on a level where the water trough may overflow at one end while the level at the inlet end is below the level of the water in the nipple. The front ends of the 1/4 inch under the water may be sloped so that it may be moved by means of a tractor or a horse. The cross bars under the drum should be bolted so that it may be moved over rough ground. It would be a good idea to hold it to the cross pieces by means of 3/4 inch round iron U bolts, the ends of which will pass through the cross pieces so that they can be tightened down on the drum with nuts on the bottom.

Homemade poultry waterers are of many types. In some cases a small valve or faucet is placed on the end of the feed pipe and the rate of flow adjusted to a steady drip which is supposed to be just sufficient to supply the wants of the birds to be watered. This method of adjustment is highly unsatisfactory, usually results in a waste of water and a muddy spot around the waterer. Another method of regulating the flow is by means of a small float valve in which the level of the water in the trough is maintained automatically by the action of the float. These float mechanisms have to be purchased, however, and are not always easy to set. The vacuum release method of feed employed in this waterer is undoubtedly the simplest for a home-made outfit, but care must be taken that the tank is really airtight and that the waterer is set level to prevent overflows.

## B.C. Swimmer Good Bet For Empire Games

VANCOUVER—Chalk this down as a certainty for Canada's team in the 1950 British Empire Games in New Zealand. Vancouver's well-known 1950 pool swimmer, Irene Strong, will be on the boat when it leaves for the Antipodes Dec. 22.

Dark-haired Irene was just another entry in the 1948 Olympic Games in London where the Canadian team failed to place in any event, but she has become quite a splash since last summer. Her record since her return from the London Games is five Canadian and one United States record broken in six months.

A veteran athlete celebrity at the age of 20, blue-eyed Irene has developed into one of Canada's brightest swimming stars in years.

She capped her winter performance in Canada and the United States, clipping 14 seconds off the 400-yard breast-stroke record against Vancouver competition held at the age of 20. Blue-eyed Irene has developed into one of Canada's brightest swimming stars in years.

Equally good was her brilliant performance against top U.S. stars at Seattle recently, when she took the Pacific Northwest title in the 400-yard breast-stroke with a time of 1:13.

Mentor Percy Norman, who has coached Irene since she was 11, expects big things from her in New Zealand.

## THINK IT OVER

People are paid money for doing the things they are told to do. People are paid salaries for doing whatever is up to them to do without being told. The difference in words is small, but the difference in dollars is amazing.

## Canada's Sheep Population Has Dropped Below The 1937 Level

OTTAWA—Less than five per cent of the 145 pounds of wool the average Canadian ate last year come from sheep. There's little chance of this proportion increasing. If it won't increase, livestock experts say, unless prices come down. And if prices come down, Canada's sheep and lamb population will probably come down even faster than it's been dropping since the end of the war.

Sheep are ideally suited for the temperate climates of New Zealand and Australia. They don't do as well in Canada's rugged winters. Even with prices at the highest levels in history, most Canadian farmers can make money with less trouble by raising cattle.

Canadian farmers sold 13 per cent fewer sheep last year than they did in 1947. It was the lowest level in this year, they've marked only half the number they did in the same period of 1948.

One reason for this drop is that a farmer can get as much money for one top-grade steer as he can for a dozen top-grade lambs. And the price of a steer is higher.

Meat experts say, however, that lamb is a luxury product from the consumer's point of view. There's more waste meat and bone on sheep than on cattle and nearly all the butcher's money must come from leg chops, booting the price. The chops don't compare in size with pork chops.

Spurred by a wartime shortage of wool for military uniforms, Canada's sheep population jumped from 2,800,000 in 1941 to 3,700,000 by 1944. It has dropped steadily since. The estimated 1948 population—2,250,000—is below the 1937 level.

## Nurses Will Serve On Mission Ship

VANCOUVER—It's into the trunk with the crisp white uniforms and on with the dungarees for two west-coast nurses off on an adventurous 16-month trip to icy northern waters.

A short time ago Evelyn Hunter and Doreen Pendray had never met. Now they will spend almost a year on a small United States medical mission vessel, visiting settlements along the Alaska coast.

Miss Hunter, a Vancouver nursing graduate, labels herself a "prairie sailor". She comes from Lacombe, Alta., and says that as a little girl she dreamed of living near the sea.

During a year's nursing at up-coast Pender Island she spent all the time possible on the water. "In any kind of a small craft—even fishing boats," she heard of the medical mission and decided to dedicate her life to it.

Miss Pendray, highly anxious to serve her profession, is a dog with the call of adventure.

"I've lived in Victoria all my life," she says, "so you can't blame me for being a bit excited."

She joined the crew after meeting with Dr. Lindsay MacKenzie, head of the mission and the ship "Willis Shook".

## Man Hours Lost Through Strikes Show Increase

OTTAWA—Strikes or lockouts have caused approximately 33 per cent more time lost in Canada's industry this year than last. It was shown in the labor department's preliminary figures for the first six months of the year show a total of 18,701 workers with a total time loss of 18,701 for the same period of 1948 there were 77 strikes with 21,304 workers involved, but the total time loss was only 458,468 days.

## Boy Honored For Averting Tragedy

SASKATOON—A 16-year-old boy was the toast of Saskatchewan. He was the guest of honor at a hotel dinner in recognition of his actions June 9, when he ran more than a mile to report a washout on the C.N.R. railway at Zeno, Sask., averting what might have been a great tragedy.

He arrived just as a passenger train was about to depart.

The boy is Robert April, son of Emilie and Mrs. April, who farm three-quarters of a section. He is one of 10 children.

The dinner was presided over by C.N.R. Superintendent D. C. Gough, and was attended by Mayor J. S. Mills, of Saskatoon, and other officials. The youth was presented with an engraved wrist watch by the C.N.R.

It was the second time Robert had ever been on a train when he arrived in Saskatoon and the first time he had ever seen a city.

## NOTICE

By the Board of Trustees of the Wheatland School Division No. 40 of the Province of Alberta

WHEREAS the Board of Trustees of the Wheatland S.D. No. 40 of the Province of Alberta on the 15th day of June, 1948, passed a by-law to borrow the sum of \$300,000.00 dollars on the security of the said District by the issues of Debentures repayable to the bearer in 20 equal consecutive annual instalments with interest at the rate of not more than eight per centum per annum for the following purposes, namely: erecting and furnishing a ten-roomed school building with auditorium, frame and stucco, in the Strathmore School District No. 1387, and erecting and furnishing a six-roomed school building with frame and stucco in the Bellevue School District No. 35.

AND WHEREAS a demand for a poll of the proprietary electors of the said Division for and against the said loan has been made as required by the School Act.

THEREFORE, I hereby given by the Board of the said Division that polls will be opened as follows:

## SUB-DIVISION NO. 1

Strathmore Legion Hall for Alenast No. 1905, Cheadle No. 947, Glenclarr No. 3879, Horvey No. 2185, Strathmore No. 1387, Bertha Vale No. 2331, Crawford No. 2393, Harwood No. 2248, Orange Valley No. 1952, Carleton Place Schoolhouse for Carleton Place No. 14, Carmichael No. 2978, Fairplay Schoolhouse for Fairplay No. 2892, Namaka Schoolhouse for Namaka No. 1919, Namaka Farm Schoolhouse for Namaka Farm No. 4249, Nightingale Schoolhouse for Nightingale No. 2181, Valley Garden No. 3058, Serviceberry Schoolhouse for Cheadle Butte No. 2516, Glamis No. 4854, Serviceberry No. 2228, Turner Schoolhouse for Turner No. 3797.

## SUB-DIVISION NO. 2

Bryn Mawr Schoolhouse for Bryn Mawr No. 2536, Columbia Schoolhouse for Columbia No. 1731, Elben Schoolhouse for Elben No. 2537, Elben Leven Schoolhouse for Glen Leven No. 2124, Glen Rock Schoolhouse for Glen Rock No. 3436, Gederich Schoolhouse for Gederich No. 2591, Herbert Spencer Schoolhouse for Herbert Spencer No. 2322, Kathryn Schoolhouse for Kathryn No. 2215.

Albertson No. 2005, Dalroy No. 2690, Hawthorne No. 4097, Bruce Lakes No. 2689, Koma No. 2327, Irwin Schoolhouse for Irwin No. 2163, Craigdu No. 4250, Parkway Schoolhouse for Parkway No. 4317.

## SUB-DIVISION NO. 3

required to govern themselves accordingly.

## H. C. WILLSON,

Secretary and Returning Officer. Dated at Strathmore this 27th day of July, 1948.

## QUALIFICATION OF VOTERS

Proprietary Elector means any elector, other than a tenant, who is liable to assessment and taxation for school purposes in respect of any property situated in a School District.

Every proprietary elector except the Returning Officer shall be entitled to vote on the by-law. (Section 193, The School Act).

## CARBON BAPTIST CHURCH SERVICES

Sunday School every Sunday morning at 10 a.m. Mr. Adam Buyer, Superintendent. We have classes for all ages and trained fundamental teachers for all classes. We have room for many children in our well equipped class rooms.

Morning worship at 11 a.m. The pastor will speak on the topic "Treasure and Heavenly Mind" (The Earthly and Heavenly Mind). The Daily Vacation Bible School which was such a great success came to a close on Friday evening with a very fine program in the Carbon Baptist Church. Mr. A. Buyer, the Sunday School superintendent, was the leader of the program. Each class presented sketches of that which they had learned in the two weeks of Christmas vacation.

We wish to express our hearty appreciation to the school board for the fine spirit of co-operation shown in the use of the local school building which added so much to our Bible School.

On Wednesday evening, August 17, at 8 p.m., a very special trained seminary male quartet of the North American Baptist Seminary of Rochester, New York, will give a sacred concert in the Carbon Baptist Church. We invite all our friends and neighbors to come and enjoy this concert.

Saturday evening, August 20, at 8 p.m., a very special Youth for Christ program will be sponsored by the Young People's organization of the Carbon Baptist Church. Rev. Miss Ruth Ruff, travelling missionary for the Jewish Mission, will be the speaker. Miss Ruff will conduct a service in the Zion Baptist Church on Sunday morning, August 21 and she will speak again at 7:30 in the evening at Carbon Baptist Church.

## ZION BAPTIST CHURCH SERVICES

Sunday School every Sunday morning at 10 a.m. Mr. Rudolph Dietrich, Superintendent. Classes for all ages and well-trained teachers for all classes.

## FARM JOYS IN JULY

July is a joyous month on the farm, full of the joy of giving the last ounce of effort one can bring from a body driven from daylight to dark. The mosquitoes go with the blackflies and advise on how to farm comes from the city visitors. Kindly and carefree vacationers revel in the sun of the beaches and the shade of the woods. Their laughter lightens the day and their music shatters the night. The glorious dawn that calls farm folk to work lights the whoopee-makers to their beds. The gates they leave open start the amusing game of finding the livestock which scatters around the countryside for miles. The scent of new-mown hay sends poets into raptures and farm boys into the sweat baths of steaming mows.

The hundreds of millions of dollars of loss through drought are accepted philosophically by visiting city-slickers who are threatening to strike and tie up the railroads in the packing plant. If they do not get one or two months holidays with pay by a reduction of their working hours by four or eight a week.

The preview of harvest tells the farm family what to expect for its year's labor and many a year's work, in addition to some expenses taken from savings, has been lost and the budget is pared to bare needs and money-saving equipment. Mother decides to make do with the old hand washing machine she postpones installing a new one of hydro for another year. Decisions are reached about whether it will be possible to send Jimmy to agricultural college in the fall or to let Mary go on with higher studies in music plans for holidays are cancelled.

Despite their toil and losses, the farm people of Canada have the joy of knowing that while they are getting less and less for more and more work, those who share the work of Canada with them will be getting more and more for less and less. —The Scene.

Although the number of hens that are laying eggs is ten per cent lower than last year, every group of 100 hens is producing 15 more eggs than last year.

We appreciate your kindness very much indeed.

## Wheat Pool Achievements

The Alberta Wheat Pool was organized by Alberta farmers some 26 years ago. Alberta Pool Elevators started business in 1926. Grain producers of Alberta put up over \$8 million to build Pool Elevator facilities. They did this because experience had taught them that only through the operation of their own co-operative grain handling system could they obtain protection and efficient service. By so doing Alberta grain producers are now freed from the shortcomings of monopoly control.

Alberta farmers have given generous support to Pool Elevators. The openness of operation and efficiency in directing and managing the Pool Elevator system has gained for this co-operative widespread respect and confidence.

In the years Pool Elevators has been in operation it has paid \$3,892,000 in cash patronage dividends, \$3,531,000 in reserves, and has redeemed contributions from original Pool members to a total of \$4,854,000.

Pool members can increase their reserve holdings by patronizing Pool Elevators. In seasons when earnings warrant same, cash patronage dividends are also paid. It is to the advantage of every Pool member to deliver his grain to a Pool Elevator.

Grain producers can become members of the Alberta Wheat Pool by the delivery of 500 bushels of grain to a Pool Elevator and the securing of Wheat Pool reserves to the value of \$5.00. Your local Pool Elevator agent will be pleased to give advice and assistance if you desire to apply for membership.

You can help the grain growing industry, agriculture in general, and yourself in particular by giving every support to

Alberta Pool Elevators

## Isn't It Funny?

That so many Business men Will get up in the morning Refresh themselves with a dose of advertised fruit salt. Clean their teeth with an advertised brush and tooth paste. Shave with an advertised razor. Wash and shave with advertised soaps. Put on advertised underwear. Advertisised hose, qarters, shirt, collar and shoes. Seat themselves at the table and Ad advertised breakfast food and bread. Drink advertised tea, coffee or cocoa. Put on advertised hat and gloves. Light an advertised cigarette With an advertised match. Go to work in an advertised motor car. Give letters to a stenographer Who types on an advertised machine. Using advertised carbons, Sign their letters with an advertised pen Containing advertised ink. And turn down a proposal to advertise On the ground that Advertising Doesn't Pay.
